## **DETAILED ACTION**

### ***Response to Request for Reconsideration***

1. This action is issued in response to applicant's Request for Reconsideration(Paper #10) filed 11/27/02.
2. No claims were amended. None were cancelled. No new claims were added.
3. Claims 1-19 are pending.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-19 are rejected under 35 USC 103(a) as unpatentable over Bowman-Amuah(US Pat. No: 6,438,594) in view of Jawahar(US Pat. No: 6,298,356) in view of von Rosen(US Pat. No: 6,493,677) and further in view of Lawlor(US Pat. No: 6,202,054).
6. As per claims 1,8,14 Bowman-Amuah teaches a method for dynamically creating a network application form(Fig 3)(Fig 7) comprising receiving a network request to apply for a plurality of products where specific information is required to apply for the products(Fig 9/902). Bowman-Amuah does not specifically teach assembling an application page for display over a network. Von Rosen teaches assembling an application page for display over a network for products or

Art Unit: 3624

services(Fig 2)(Abstract)(Fig 8A)(Fig 8B) assembled from a plurality of documents.Jawahar teaches whereby each document contains at least one field in the document containing one field related to information required to make an application (Fig 3/118/94/92/90/114/116/120)(Fig 5)(Fig 6)((Fig 8)(Fig 9/274)(Fig 10) and receiving information input corresponding to each field contained in each application page(col 2 lines 6-59).Jawahar further teaches parsing the uniform resource locator(col 2 lines 18-27)(col 11 line 60-col 12 line 3)(Fig 10)(col 19 lines 34-36)(Fig 13)(col 21 lines 44-49). Lawlor teaches a decision module in communication with a dynamic application module(Fig 17B)(Fig 13)(Fig 12)(Fig 14-15). It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosen(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an

Art Unit: 3624

apparatus for delivering banking and other financial services to customer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

7.As per claims 2,15 Bowman-Amuah teaches according to claims 1,14 respectively. Bowman-Amuah does not specifically teach data validation.Jawahar teaches data validation and dynamically generated pages containing critical information(col 18 lines 28-col 19 line 2)(col 6 lines 40-58)(col 13 lines 29-31)(col 20 lines 34-44).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above., The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosen(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to cusomer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

Art Unit: 3624

8. As per claims 3,16 Bowman-Amuah teaches according to claims 1,14 respectively. Bowman-Amuah does not specifically teach forwarding information input to a decision module for processing the information input. Lawlor teaches this(Fig 1A/80/80D).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosen(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to customer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

9.As per claims 4,17 Bowman-Amuah teaches according to claims 1,14 respectively. Bowman-Amuah does not necessarily teach determining whether the request to apply originates from a customer that is logged into a session manager. Jawahar teaches this(Fig 3/102/120)(Fig 11/400)(Fig 13/610)(Fig 14).It would have been obvious to one skilled in the art at the time of

Art Unit: 3624

the invention to combine Bowman-Amuah with Jawahar to teach the above., The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosen(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to cusomer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

10. As per claims 5,18 Bowman-Amuah teaches according to the method of claims 1,14 respectively.Bowman-Amuah does not specifically teach wherein the plurality of products includes banking products and the specific information required to apply for an amount of credit to be extended. Jawahar teaches this(col 19 lines 38-46).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-

Art Unit: 3624

63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosn(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to cusomer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

11. As per claim 6,19 Bowman-Amuah teaches according to the method of claims 5,18 respectively. Bowman-Amuah does not specifically teach including the step of forwarding the information input to a decision module for processing the information input to determine if data input justfies extension of credit(col 19 lines 38-47).Lawlor teaches this(Figs 12-17).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention

Art Unit: 3624

to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above.

The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosen(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to cusomer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

12. As per claim 7 Bowman-Amuah teaches according to claim 1. Bowman-Amuah does not specifically teach wherein the request is in the form of parameters received with a URL. Jawahar teaches this(col 21 line 56-col 22 line 3).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosen(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von

Art Unit: 3624

Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to customer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

13. As per claim 9 Bowman-Amuah teaches according to claim 8. Bowman-Amuah does not specifically teach the following. Jawahar teaches this wherein the universal session manager is in communication with the dynamic application module(Fig 2/62) for creating a verification of the originator of the request and a profile database(Fig 2/58) in communication with the dynamic application module which stores data regarding the request originator as well as(col 7 line 53-65).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosen(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and

Art Unit: 3624

other financial services to customer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

14. As per claim 10 Bowman-Amuah teaches the system according to claim 9. Bowman-Amuah does not specifically teach comprising a host server wherein the dynamic application module the session manager and the database reside on the host server. Jawahar teaches this(Fig 2)(col 7 line 18-col 8 line 7).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosn(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to customer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

Art Unit: 3624

15. As per claim 11 Bowman-Amuah teaches the system according to claim 10 wherein the host server is connected to a network(Fig 23)(Fig 84)(Fig 87)(Fig 88)(Fig 100)(Fig 89)(Fig 119)(Fig 120)(Fig 121)(Fig 127)(col 2 lines 19-55).

16. As per claim 12 Bowman-Amuah teaches the system according to claim 11. Bowman-Amuah does not specifically teach the dynamic application module providing the application in the form of an application page over the network to the originator of the response. Von Rosen teaches this(Fig 6-9).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4).It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosen(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to cusomer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).

Art Unit: 3624

17. As per claim 13 Bowman-Amuah teaches the system according to claim 8. Bowman-Amuah does not specifically teach a processing database in communication with the dynamic application module where the database is used for receiving data regarding use of the dynamic application module. Von Rosen teaches this(Fig 5).It would have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar to teach the above. The motivation to combine is to teach the search of static and dynamically generated web pages having information on them with respect to products or services (col 16 lines 59-63)being accessed by a web server with respect to information gathered and resources spent on the search of these pages as enunciated by Jawahar(col 1 line 59-col 2 line 4). It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar and further in view of von Rosen to teach the above. The motivation to combine is to teach an apparatus for creating and ordering merchandise over a network as enunciated by von Rosn(col 1 line 64-col 2 line 12) at a website.It would also have been obvious to one skilled in the art at the time of the invention to combine Bowman-Amuah with Jawahar in view of von Rosen and further in view of Lawlor to teach the above. The motivation to combine is to teach an apparatus for delivering banking and other financial services to cusomer homes and offices over a network as enunciated by Lawlor(col 6 lines 24-31).
